Junior Full Stack & Application Developer | Open to Internship, Contract, and Entry-Level roles

Motivated and adaptable developer with real-world experience across web and desktop applications. Skilled in React.js, Node.js, Java Spring, VB.NET, MySQL, and REST API integration. Able to manage projects end-to-end from system analysis, database design, and UI implementation to deployment. Experienced in IT support and troubleshooting for enterprise applications. Eager to contribute to impactful projects in Australia while continuing to grow professionally.

Career Objective

I am eager to join an organisation where I can gain real-world experience, strengthen my technical skills and grow within a professional team environment. My priority is professional development and contribution while being flexible with compensation in exchange for valuable learning opportunities.

Technical Skills

Languages: Java, JavaScript, VB.NET, SQL

Frameworks/Libraries: React.js, Node.js, Spring MVC, PrimeFaces, Godot (GDScript)

Databases: MySQL, SQL Server, Oracle, MongoDB

Tools: Git, Maven, Eclipse, Jira, SQL Developer, Crystal Reports

Other: REST APIs, OTP Authentication, LINE API Integration, Docker (basic), n8n (basic)

Projects & Work Experience

Full Stack Developer – HRIS System (Internship)

Toyota Buzz (Thailand), Apr 2016 – Oct 2016

Stack: Java, Spring MVC, MySQL, JSP, PrimeFaces, Crystal Reports

- Developed secure login system, CRUD operations, and employee reporting features
- Delivered internal HR tool used by 100+ staff for attendance and data management

Full Stack Developer & IT Support – Inventory Delivery System

Yaowarat Bangkok Gold Shop HQ (Chiang Rai), 4-month contract

Stack: VB.NET, MySQL, Crystal Reports, SQL Server (Quark Integration)

- Developed and maintained inventory delivery system for 200+ gold shop branches
- Integrated SQL Server (Quark) data into MySQL for synchronized inventory
- Provided IT support and troubleshooting for Quark application and related systems
- Enabled role-based access for store staff, admins, and delivery workers
- Generated printable receipts and delivery tracking reports

Game Developer – Internal Project (Confidential)

Company in Thailand, 7-month contract

Stack: Godot Engine (GDScript), MySQL

- Implemented gameplay logic and interactive elements using provided UI
- Focused on front-end scripting and internal tool usage

Front-End Developer – Vaccination Appointment System

Kasemrad Sriburin Hospital (Chiang Rai), 2-month contract

Stack: React, SQL Server, LINE API

- Developed appointment booking system with OTP login and LINE confirmation
- Designed CRUD dashboard connected to existing hospital database
